

Michal Ferber has been in the Information Technology field for over 25 years with the last 18 focused in healthcare. He grew up in the construction world – his dad was a GC – and his construction experience has bled over into the IT arena. For the last 14 years, Michal was responsible for designing and implementing all telecommunications and IT infrastructure for all construction projects for a large regional medical center.

His experience ranges from developing software for small start-up businesses, large national manufacturing facilities, and regional healthcare systems to building network infrastructures ranging from small LAN sites and large WAN sites consisting of more than 45 locations. He has built PBX infrastructures with proven cloud-based VoIP solutions and enterprise Avaya Aura systems.

Michal has built relationships that span more than 14 years with carriers like HTC, FTC, AT&T, Segra, and Spectrum. These relationships have breadth and depth; he's worked with them on countless projects and new construction builds.

He has amassed several IT certifications including video management, access control, PBX, Microsoft, and more.

Out of that experience, Michal formed Ari Integration to fulfill the need for an accomplished and knowledgeable partner for the Southeast.

Ari Integration specializes in the following:
